LANGUAGES

PHP	JavaScript
TypeScript	Java
SQL	

FRAMEWORKS

React.js	Node.js
Express.js	Next.js
.NET Core	

DATABASES

MySQL	MongoDB
Redis	MS-SQL

CLOUD

AWS	Azure
Docker	Kubernetes
CI/CD	

CONCEPTS

REST APIs	Microservices
System Design	Multithreading
OOP	Inheritance
Polymorphism	

TOOLS

Git	GitHub
Linux	VS Code
Jira	

EDUCATION

B.E. Computer Science & Engineering

CGPA: 7.50 / 10

Angadi Institute of Technology & Management, Belagavi

2019 – 2023

SOFT SKILLS

- Team Collaboration
- Agile / Scrum
- Problem Solving
- Communication
- Time Management

PROFESSIONAL SUMMARY

Full Stack Developer with ~2 years of experience designing and delivering scalable backend systems for banking and enterprise applications. Proficient in PHP, React.js, and cloud-native technologies (AWS, Azure, Docker). Proven track record of improving system performance through Redis caching and containerization. Adept at building RESTful APIs, microservices, and CI/CD pipelines.

PROFESSIONAL EXPERIENCE

Full Stack Developer

Rachna Infotech · Belagavi, India Sep 2025 – Present

- Architected scalable backend banking modules in PHP, supporting high-volume transactional workloads.
- Reduced API response times by ~35% implementing Redis caching strategies across critical endpoints.
- Containerized services with Docker, ensuring environment consistency across dev/staging/production.
- Built React.js dashboards and integrated third-party REST APIs for payment gateways and banking.
- Delivered features in 2-week sprints collaborating cross-functionally via Jira.

Full Stack Developer

DevPOLer · Remote May 2025 – Sep 2025

- Built secure backend APIs in Next.js for end-to-end authentication workflows (OAuth2, JWT).
- Integrated AWS (S3, Lambda, SES) and Firebase for real-time data sync and file storage.
- Ensured 99.9% uptime SLA with fault-tolerant cloud architecture and auto-scaling.

Software Developer

Hiddle · Hyderabad, India Dec 2023 – Jul 2024

- Deployed apps on Microsoft Azure (App Service, Azure SQL), cutting release time 60% via CI/CD.
- Developed React.js components improving UI responsiveness and reducing page load time.
- Refactored monolithic modules into reusable service layers, improving backend scalability.

PROJECTS

IoT-Based Smart Agriculture System

Personal Project · 2022

- Designed automated irrigation system using ESP8266 microcontrollers and soil moisture sensors.
- Built real-time monitoring dashboard improving water efficiency ~40% via data-driven triggers.
- Integrated MQTT protocol for sensor-to-cloud communication enabling remote monitoring.
